

## **Programming**

they poke my fingers

the shocking lingers

they make me fly

like the butterfly sky

fly away home

never roam

always to return

or else you'll burn

mirror mirror on the wall

spin around until you fall

circles fast and circles strong

to the sound of this never-ending song

mirrors and shadows

shadows and mirrors

can't tell now which is which

it's all controlled by the double helix

seven layers in each one

spin around until you're numb

loops and webs and castles and mazes

do not talk or else your skin she grazes

alpha splits and delta kills

beta's got all her sexy skills

omega is self-destruct and theta knows  
while gamma make sure no one knows  
misdirect and misinform  
those are the rules and that is the form  
even willow whips can weather the storm  
deeper and deeper into the abyss  
i'm not supposed to tell you any of this  
it does not mean that we are friends  
but i will show you where the rainbow ends  
pinks are the innocents that reds did rape  
blacks do the rituals in satan's cape  
purples in control under only gold  
blues protect, light for you and darks to be sold  
orange is the warning bell  
and yellows try to protect from hell  
greens are family and clears just a shell  
spiritual silver and browns in disguise  
but especially the golds for our demise  
platinum for the seven seals  
and to be sure that no one heals  
pinwheel pinwheel spinning around  
look into my pinwheel and see what i've found  
pinwheel pinwheel spinning around

look into my pinwheel and see what i've found  
that old black magic has me in its spell  
that old black magic that they weave so well  
round and round we go  
down and down we go  
who's to know  
no one can show  
that spinning game  
is always the same  
access the perpetrators so they can access you  
this same old story is never new  
you will win if you respond to the cue  
session in and session out  
you're not to know what it's really about  
thought-stealing and scrambling  
just to keep people rambling  
emotion explosion  
anything for erosion  
counsellor distancing  
makes it all encompassing  
the goal is disruption  
or even corruption  
just as you think she'll yield

we'll mess with the playing field  
it isn't just alter specific, but really global  
that's the only way to keep her mobile  
we have to enforce compliance with the directive  
and you guys get in the way when you play detective  
spin and whirl and turn and storm  
for her sanity we'll be sure she'll mourn  
when we make it global for all  
the effects do make everyone fall  
whirlpool, whirlwind, tornado, cyclone, abyss  
she can't even get a hold on this  
whirling, twirling, swirling  
she's gonna be hurling  
pain contests and competitions  
delete the last bit of inhibitions  
mirror in mirror and shadow behind shadow  
they will never let her go  
deeper and deeper round and round  
we know that she'll never be found  
one inside another inside another  
we are all going to be smothered  
sub system here and sub system there  
look there are insiders everywhere

the circular array of concentric rings  
she still has not earned her wings  
spinning so fast the world is a blur  
we might as well go ahead and kill her.
